Objective

As a full stack developer, I believe that IT is a passionate industry and it can achieve massive business values and build competitive advantage in modern world.

Education

Monash University

Dec 2015: Master of Business Information System & Master of Information Technology

- Distinction in Industry Experience Course

Experience

JB Hi-Fi | South Gate

Software Developer Aug 2018 – Now

As a Software Developer, I can work independently on different business requirement and provide full solution, providing production support, and helping junior developers.

- Build a payment solution for online website using React, AWS Lambda, connect BrainTree
- Add a new feature on Store PDA App using Xamarin, .NET API
- Build pipeline on Azure DevOps
- Using TDD & BDD
- Production Support
- Giving guidance for junior developers

JB Hi-Fi | Chadstone

Junior Software Developer May 2017 – Aug 2018

As a Junior Software Developer, my main responsibility is around building backend API, Event Driven Solution, writing unit tests, and documentation.

- Build a .NET Framework Backend API from scratch and deploy to Prod
- Build a full event driven API solution for Store Staff Coaching
- Implementation some requirement in Node.js API
- Write Unit Tests
- Get involved in Production Support
